## GRAND ROUNDS

### Engaging the Public in Addressing the Socio-economic Determinants of Health to Reduce Health Disparities

The populations in many states face tough socio-economic conditions that are associated with health deficits. While Health Care Reform is expected to help improve health care for low income populations, it will not eliminate health disparities related to socio-economic factors.

It would be ideal to offer inter-sectoral policies that address the socio-economic determinants of health but tight budgets make this difficult. A recipient of many honors and awards, Dr. Danis will highlight evidence that low income urban residents can engage in prioritizing interventions to address the social determinants of health in a way that may usefully inform public policy.

#### **Marion Danis, M.D.**

Head, Ethics and Health Policy  
Department of Bioethics  
Clinical Center  
National Institutes of Health

Wednesday, March 21, 2012  
Noon to 1:00 p.m.

Clinical Research Building  
Conference Room 989  
1120 N.W. 14th Street

Public Health Student  
Association Fundraiser: Snacks  
and bottled water will be  
available for purchase.
