• Religious Refusals of Blood
• Patient Safety
• Translational Science Ethics

21st Annual Conference

SPRING 2013
MIAMI MARRIOTT BISCAYNE BAY
APRIL 5, 2013

www.miami.edu/ethics
Ethical challenges facing health professionals have never been more important or more numerous. This program emphasizes themes in new stem cell therapies, dimensions of hospice care, brain science and ethics, religious refusals of blood, patient safety, and hospital ethics committees. From the role of ethics committees to controversies in public policy, it is clear that bioethics – and bioethics education – must be assigned the greatest possible roles in the daily lives of individual professionals and their institutions.

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of the University of Miami Leonard M. Miller School of Medicine and the Florida Bioethics Network. The University of Miami Leonard M. Miller School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

All conflicts of interest of any individual(s) in a position to control the content of this CME activity will be identified and resolved prior to this educational activity being provided. Disclosure about provider and faculty relationships, or the lack thereof, will be provided to learners.

The University of Miami Leonard M. Miller School of Medicine designates this live activity for a maximum of 6.0 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Continuing education credits for Nurses, Psychologists and Social Workers have been applied for. The Florida Bar has approved Florida Ethics: Debates, Decisions, Solutions for 7.0 General CLE Credits, 5.0 Elder Law Certification Credits, 5.0 Health Law Certification Credits (Reference 1301143N). This activity may be used for continuing education credit for chaplains certified with the Board of Chaplaincy Certification Inc.
Program

Upon completion of this program, participants will be able to:

• Assess and reify the role and importance of bioethics in clinical and institutional decision making, especially regarding end-of-life care, consent and refusals, patient safety, and the role and the function of ethics committees and other topics.
• Identify and modify practice based on ethical challenges and issues in clinical practice, public policy, health law and the role of institutional ethics committees.
• Analyze and articulate ethically optimized solutions in clinical and public health contexts.

This course is designed for physicians, lawyers, nurses, social workers, clergy, psychologists, health administrators, philosophers and others with an interest or a need for continuing education in health ethics.

Target Audience

This course is designed for physicians, lawyers, nurses, social workers, clergy, psychologists, health administrators, philosophers and others with an interest or a need for continuing education in health ethics.
