

Announcing the 1st in a series of seminars on

Environmental

ETHICS

Science, Nonscience and Nonsense: Ethics and Environmental Literacy

Michael Zimmerman, Ph.D.
University of Wisconsin, Oshkosh

12 Noon, Friday, April 12, 2002; RSMAS Map & Chart Room
Rosenstiel School of Marine and Atmospheric Science

Lunch will be provided

Americans' scientific ignorance is so broad and pervasive that it is blameworthy – it permits environmental boondoggles, cynical disinformation campaigns and a cheapening of public discourse. Environmental ethics and environmental literacy are thus closely linked.

Michael Zimmerman is Dean of the College of Letters and Science and Professor of Biology at the University of Wisconsin Oshkosh. A Fellow of the American Association for the Advancement of Science, he is the author of *Science, Nonscience, and Nonsense: Approaching Environmental Literacy* (The Johns Hopkins University Press 1995).

A collaboration by the National Institute of Environmental Health Science's Marine and Freshwater Biomedical Science Center, the AMBIENT Project, and UM Ethics Programs. Information: 305-243-5723 or ethics@miami.edu.
