### Target Audience:

Physicians, residents, medical students, nurses and other clinical staff.

### Objectives:

At the conclusion of this activity participants will be able to discuss:

- Summarize key findings from the study comparing patient perceptions of AI-drafted versus clinician-drafted electronic messages, including the impact of AI disclosure on patient satisfaction and trust
- Discuss the ethical considerations related to the use of AI in patient communication, particularly transparency, autonomy, and preservation of the physician–patient relationship
- Identify practical approaches for clinicians and health systems to ethically integrate AI tools in communication workflows while maintaining professional integrity and patient trust
- Summarize the key points and purpose of Dankwa-Mullan's commentary on AI, ethics, and equity
- Identify the major types and sources of bias in AI systems used in medicine and public health
- Explain ethical principles that should guide equitable AI design and deployment
- Discuss the potential benefits and risks of AI for health equity
- Reflect on how these concepts apply to clinical training, research, and patient care in your own institution
