**Meeting ID:** 824 1432 9924  
**Passcode:** 699797

***All attendees must complete the post-activity evaluation to receive credit.***

## Target Audience:

Physicians, residents, medical students, nurses and other clinical staff.

### 1. Objectives:

At the conclusion of this activity participants will be able to discuss:

- Define diagnostic uncertainty
- Analyze how autonomy, beneficence, maleficence inform decisions about communicating uncertainty
- Evaluate the pros and cons of communicating diagnostic uncertainty

### 2. Objectives:

At the conclusion of this activity participants will be able to discuss:

- Understand whether racial minority (American Indian or Alaskan Native, Black, or Hispanic patients) have different rate of early DNAR orders compared to White patients
- Understand whether survival differences by race and ethnicity persists among patients with early DNAR orders
- Explore and understand issues that impact survival to hospital discharge after in hospital cardiac arrest in racial minority as compared to White patients
