## GRAND ROUNDS

# Politics, Surveillance, Science & the 'Cuban Brain Waves' Case

Noon, April 12, 2018

Sylvester Support Services Building (across from McDonald House)

### Jonathan D. Moreno, PhD

David and Lyn Silfen University Professor of Medical Ethics & Health Policy and of History & Sociology of Science, University of Pennsylvania

### Sergio Litewka, MD, MPH

Associate Professor of Surgery and Director, International Projects, Institute for Bioethics and Health Policy, Miller School of Medicine

**Starting in late 2016, government personnel stationed in Havana reported sensorial and auditory experiences that were followed by an array of symptoms consistent with the manifestations of traumatic brain injury. A political attack? Surveillance gone awry? Cold War politics revisited? This exchange will address controversies related to the policy issues and ethical aspects of a sequence of events that represents a strikingly peculiar episode in U.S.-Cuba relations.**
