

UNIVERSITY OF MIAMI/VA MEDICAL CENTER
DIALOGUES IN RESEARCH ETHICS

Dialogue 5

Social Implications of Genetic Testing

Ray Moseley, Ph.D.
University of Florida College of Medicine

Noon, Friday, Feb. 25, 1994 VA Research Conference Room 2-104

—→Lunch will be provided←—

Dramatic advances in genetic testing and diagnosis continue to challenge society's ability to keep pace with scientific change. From research and privacy to insurance discrimination and health care reform, progress in genetics poses some of the most difficult social and ethical dilemmas in the history of biology. This Dialogue will review some of the issues at the nexus of basic research and clinical practice.

Dr. Ray Moseley is Director of the University of Florida School of Medicine Medical Humanities Program and principal investigator of a major NIH study of ethical and legal aspects of genetic testing.

Dialogues in Research Ethics is a series of monthly conferences. For more information about the series, phone 547-5723, write to medical campus box M-825 or send e-mail to kgoodman@newssun.med.miami.edu. Sponsors:

- UM Forum for Bioethics & Philosophy
- Vice Provost & Deputy Dean for Research
- Department of Microbiology and Immunology
- Research Service of the Miami VAMC
- S. Florida VA Foundation for Research and Education
- School of Nursing
