DIALOGUES IN RESEARCH ETHICS

Dialogue 5

Authority and Ethics: How Science Creates Experts

Jeffrey P. Brosco, M.D., Ph.D.

University of Miami

1:30 P.M., Friday, March 31, 1995

VA Medical Center B-939

—————→ Light refreshments will be provided ←————

The authority of physicians and scientists is usually presumed to derive from their specialized training and the link between laboratory discovery and clinical success. But this view has been radically challenged over the past quarter century. If the challenges are correct, there is no special foundation for this authority--or for physicians' and scientists' standing in debates over clinical and research ethics.

Dr. Brosco, a physician and historian, is a resident in the University of Miami Department of Pediatrics.

Dialogues in Research Ethics is a series of monthly conferences. For more information about the series, phone 547-5723, write to Medical Campus Box M-825 or send E-mail to kgoodman@newssun.med.miami.edu
