

Dialogue 4

**Responsible Conduct of Research:
The Government's Role – and Rationale**

Alicia Dustira, Ph.D.

U.S. Office of Research Integrity, Rockville, Md.

12 Noon, Friday, Jan. 18, 2002

Rosenstiel Building 6018 (Pharmacology Conference Room)

—————→ Lunch will be provided ←————

Increased attention to scientific integrity and the responsible conduct of research is driven by a number of forces, including intellectual excitement, federal rules and dramatic examples of misconduct. In fact, much of the Federal government now sees its role as being that of a source of tools, encouragement and support, rather than as police officer and regulator.

Dr. Dustira is Deputy Director of the Division of Education and Integrity in the Office of Research Integrity (ORI) of the U.S. Department of Health and Human Services, where she develops and manages a variety of educational programs designed to prevent research misconduct and foster the responsible conduct of research. Before joining ORI in 1993, she served as Executive Secretary for the President's Council of Advisors on Science and Technology in the Office of Science and Technology Policy.

Dialogues in Research Ethics is a series of monthly conferences. For more information, phone 305-243-5723, write to Campus Box M-825 or send E-mail to ethics@miami.edu
