

:::22ND ANNUAL SERIES:::

UNIVERSITY OF MIAMI ETHICS PROGRAMS & MIAMI CTSI; SPECIAL PARTNER: IRB GRAND ROUNDS

DIALOGUES IN RESEARCH ETHICS

DIALOGUE 152

Ethics, Translational Science & the IRB: The Future is (Still) Not What It Used to Be

Kenneth W. Goodman, Ph.D.

University of Miami

2:30 p.m., Tuesday, December 10, 2013

Mailman Center for Child Development, 8th Floor Auditorium

[Note variant day, time and venue.]

A long and useful tradition of human subjects protection, forged in the crucibles of Nuremburg and Tuskegee, is no longer adequate to the challenges of 21st-century bioscience: Risks and benefits are different, consent has evolved and privacy is no longer about protecting patient information in paper binders. A nimbler and more nuanced IRB will help protect civil and human rights, better capture the values of ordinary people and ensure the shared benefits of translational science.

Dr. Goodman, a former member of the University of Miami IRB, directs UM's Bioethics Program. He is Professor of Medicine and jointly of Philosophy and other departments.

Dialogues in Research Ethics is a series of monthly conferences. For more information, phone UM Ethics Programs at 305-243-5723 or E-mail ethics@miami.edu.
