

DIALOGUE 170

The Erosion of Research Integrity: The Need for a Culture Change

Lee M. Ellis, M.D.
University of Texas

1 p.m., Friday, November 18, 2016

Sylvester Comprehensive Cancer Center, Room 1301

Note venue in collaboration with the Sylvester Comprehensive Cancer Center

Lunch provided – first come, first served

The evolution of our academic environment now provides “perverse incentives” – according to the NIH – for publishing flashy research as opposed to reporting the whole story. Our culture must change if we are to rely upon solid preclinical data that will lead to success in clinical studies. Issues that lead to a lack of data reproducibility will be discussed, and examples of “selective reporting” will be shown.

Dr. Ellis is Professor of Surgical Oncology and Molecular & Cellular Oncology and The William C. Liedtke, Jr., Chair in Cancer Research at the University of Texas’ MD Anderson Cancer Center.

Dialogues in Research Ethics is a series of monthly conferences. For more information, contact the UM Miller School of Medicine Institute for Bioethics and Health Policy at 305-243-5723 or ethics@miami.edu.
