Meeting ID: 934 2130 3093 Passcode: 822453

### From Principles to Practice: Building Trustworthy Health Systems in the Information Age

Jodyn Platt, PhD, MPH, University of Michigan

The proliferation of data, information, and digital knowledge systems that use Artificial Intelligence and other advanced health analytics poses urgent questions about what can and ought to be done with data in the delivery of health and public health services. This Dialogue will examine research and practice opportunities to engage with the ethical, legal, and social issues in AI and other information systems used in healthcare, with special regard for empirical research on patient and public stakeholder perspectives.

---

Dr. Platt is an Associate Professor of Learning Health Sciences at the University of Michigan, where she was trained in medical sociology and health policy. Her research focuses on issues at the intersection of biomedical informatics and ethics. She is interested in understanding what makes data-driven health trustworthy and the pathways for earning, achieving, and sustaining trust across stakeholders.
