

27TH ANNIVERSARY SERIES

INSTITUTE FOR BIOETHICS AND HEALTH POLICY PRESENTS

DIALOGUES IN RESEARCH ETHICS

DIALOGUE 187

Medicine in the Era of the “All of Us” Research Program

Stephan Züchner, MD, PhD

University of Miami Miller School of Medicine

12 noon, Friday, December 14, 2018

Mailman Center for Child Development, Room 5003

Lunch provided; first come, first served.

Genetic research is increasingly organized in large-scale consortia. This has advantages – and poses a number of interesting and important ethical challenges. These include the creation and use of very large bio- and data repositories, managing incidental findings and the task of establishing and sustaining trust among study participants. The All of Us Research Program is the largest such project ever undertaken by the NIH and will shape biomedical science for the next decade and beyond. This presentation will provide an overview of the project, describe UM’s role in the partnership and address a number of the ethical issues raised by the collaboration.

Dr. Züchner is Professor of Human Genetics and Neurology at the University of Miami Miller School of Medicine, Chair of the Dr. John T. Macdonald Foundation Department of Human Genetics and Co-Director, John P. Hussman Institute for Human Genomics.

Dialogues in Research Ethics is a series of monthly seminars. For more information, phone UM Ethics Programs at 305-243-5723 or E-mail ethics@miami.edu.
